

FINAL RESULTS OF THE LABOR FORCE SURVEY: 2013 to 2015

More males than females in NCR

The final results of the April 2015 round of Labor Force Survey (LFS) revealed that males dominated the workforce in NCR with 55.8 percent while females shared only 44.2 percent.

The results of LFS also showed that from January 2013 to April 2015, males consistently dominated the labor sector in NCR. *Refer to Table 1 for details.*

Women dominate Services Sector in NCR

According to the April 2015 results of the LFS, the Services Sector in NCR had the highest proportion of employed females at 89.7 percent. Majority of these women were employed in the Wholesale and Retail Trade Industry (30.2%), and Other Service Activities (9.3%). These were also observed in the April 2014 LFS round. Refer to Table 2 for details.

Total Employment: Males outnumber Females across regions

The April 2015 results of LFS revealed that across regions, males outnumbered females in terms of total employment in the country. Region IVA topped the rank with 2.92 million employed males, followed by NCR with 2.63 million. Rounding the top three with the most number of employed males was Central Luzon with 2.55 million. Caraga and Cordillera Administrative Region had the lowest number of employed males with 0.69 and 0.46 million respectively.

In terms of the number of employed females, CALABARZON ranked first with 2.22 million. This was followed closely by the National Capital Region and Central Luzon with 2.08 million and 1.62 million employed females, respectively. Refer to Table 3 for details.

Highest proportion of employed males in ARMM

In terms of proportion, ARMM's work force was dominated by males, comprising 71.2 percent of the total. Davao Region followed with 64.2 percent, and Zamboanga Peninsula with 64.1 percent. Refer to Table 3 for details.

2010 CENSUS OF POPULATION AND HOUSING

More Females than Males in NCR

The results of the 2010 Census of Population and Housing revealed that there were more females than males in NCR. Females accounted for 51.0 percent of the total population compared to 49.0 percent of the male counterpart. These figures resulted to a sex ratio of 96 males for every 100 females which was the same figure recorded in 2000.

The reverse was observed in the Cities of Navotas and Valenzuela which had more males than females. Meanwhile, City of San Juan had the lowest sex ratio of 82 males per 100 females. Refer to Table 4 for details.
